Fremont, CA | (510) 738-8155 | spoigai21@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | U.S. citizen

EDUCATION

Santa Clara University — B.S. in Computer Science

Expected Fall 2027

Major GPA: 4.0

WORK EXPERIENCE

Co-Founder & CTO/Lead Software Engineer

May 2026 – Present

Adorus (adorusjewels.com)

- Sole developer on a 4-person founding team, building a full-stack jewelry e-commerce platform end-to-end across 6 planned development phases (pre-launch).
- Designed and shipped an AI virtual try-on feature rendering a photorealistic preview of a customer wearing the exact product via Google Gemini; benchmarked 5+ image-generation approaches on identity preservation, fidelity, latency, and cost (~\$0.05/image).
- Implemented a custom AWS build over Shopify, self-hosting for ~\$40/month vs. ~\$250+/month for an equivalent plan plus paid apps — an ~80% (~\$2,500/year) cut in recurring platform costs.
- Built a responsive React (Vite) frontend on Java Spring Boot REST services and PostgreSQL (AWS RDS) across 5 AWS services (EC2, RDS, S3, CloudFront, Cognito), with GitHub Actions CI/CD, 33 Flyway migrations, and 35+ API endpoints; integrated Stripe for PCI-compliant checkout and Cognito auth.
- Diagnosed a tax-accounting bug by sourcing authoritative totals from Stripe, backed with 3 regression tests; authored a [blog post](#) on human oversight of AI coding tools after a production migration incident.

Software Engineering Intern

June 2026 – Present

HerbsPro

- Implementing backend features across the e-commerce stack.

Machine Learning Research Assistant

Dec 2025 – June 2026

Santa Clara University

- Co-authored a peer-reviewed paper as primary writer, accepted at HIBIBI 2026 (ASONAM-collocated), publishing with Springer.
- Built an NLP/data pipeline analyzing 5,000+ scraped posts from Twitter, Reddit, and YouTube to study public sentiment toward LLMs as a therapeutic tool, applying BERTopic, LDA, and NMF topic modeling.
- Engineered Pandas preprocessing to normalize unstructured text, reducing noise in high-dimensional social media datasets.
- Produced Matplotlib / Seaborn analytics on shifting attitudes toward AI mental-health support.

CS Teaching Assistant & Algorithms Grader

Sept 2025 – June 2026

Santa Clara University

- Mentored 40+ students in C++ (memory management, pointers, OOP) and debugged logic errors live using GDB
- Graded Theory of Algorithms coursework for 40+ students across 2 sections, evaluating runtime analysis, greedy, divide-and-conquer, and dynamic-programming solutions.

PROJECTS

Disease Tracker (AWS Hackathon)

Oct 2025

React, FastAPI, AWS Bedrock, DynamoDB

[Github](#)

- Built a FastAPI REST API serving real-time disease metrics and risk assessments with low-latency responses.
- Engineered an AWS Bedrock AI risk-scoring pipeline and designed DynamoDB schemas for scalable data ingestion.

Kuhn Poker vs Quantum

June 2026

Qiskit, IBM Quantum, FastAPI, React, Vercel, Render

[Github](#), [Live](#)

- Built a full-stack game where a 12 parameter, 6-qubit variational quantum circuit (superposition + entanglement) derives the opponent's mixed strategy, deployed on Vercel and Render.
- Ran the circuit on real IBM quantum hardware (e.g., `ibm_fez`, `ibm_mukesh`); on a 4,096-shot run, real-chip probabilities matched simulation within ~1.7 percentage points on average (max ~4), the gap attributable to quantum noise.

Agentic Restaurant RAG

July 2025

Python, ChromaDB, Ollama, MCP, RAG

[Github](#)

- Built a RAG system answering natural-language restaurant questions via ChromaDB semantic search.
- Exposed data as agent tools over MCP; tested on OpenWebUI with Ollama.

TECHNICAL SKILLS

Languages: C++, Python, Java

Frameworks & Tools: React.js, Node.js, Spring Boot, FastAPI, Docker, Linux, Qt, Git, Vercel, CI/CD, Render

Cloud & Data: AWS (EC2, Bedrock, Cognito, S3, Cloudfront), PostgreSQL, DynamoDB, ChromaDB, Hotjar

AI / ML: RAG, MCP, NLP, Ollama, OpenWebUI, NumPy, Pandas, Matplotlib, topic modeling (BERTopic, LDA, NMF)

Others: Qiskit, IBM Quantum, Claude Code
