EDUCATION

Santa Clara University — B.S. in Computer Science

GPA: 3.9

Expected December 2027

Available Summer 2027 (Fall 2027 term remaining)

- **Relevant Coursework:** Operating Systems, Advanced C++, Advanced Algorithms, Data Structures & Algorithms, Theory of Automata, Discrete Mathematics

WORK EXPERIENCE

Software Engineering Intern

June 2026 – August 2026

HerbsPro

- Built a Pandas **ETL pipeline** that normalized 150+ unstructured meeting notes into a fixed schema, extracting supplier terms into structured records.
- Built a Python MCP server (FastMCP) as the only access path for LLM agents into a legacy MySQL WMS: read tools for live stock, write tools emitting split-shipment pick tickets instead of raw table mutations.
- Cut MySQL query volume 60% and product API p50 from 200 ms to 90 ms with a cache-aside Redis layer using event-driven invalidation across a 50,000+ SKU catalog.

Software Engineer

May 2026 – Present

Adorus

- Built a **two-stage image-retrieval pipeline** (PyTorch, CLIP ViT-B/32) that crops queries to the worn-object region with YOLO11-pose (ONNX), moving the correct match from rank 3 to rank 1; inference runs in AWS Lambda with catalog embeddings precomputed and ranked by cosine similarity in Postgres.
- Fixed a **production** tax bug that folded tax into shipping totals, re-sourcing amounts from Stripe's API with 3 regression tests; hardened a Flyway migration against a cross-environment failure.
- Diagnosed a **production** checkout outage from one customer screenshot: an apex-only CORS allowlist made every POST from the www host return 403, which CloudFront rewrote into a 200 carrying HTML; traced it through nginx logs to 97 failed requests from 19 visitors and fixed it at the CDN and origin.
- Built **590 automated tests** with PIT mutation testing in CI and a custom API-contract gate checking every frontend /api call against the backend's request mappings, catching route drift at review time.

AI/ML Research Assistant

Dec 2025 – June 2026

Santa Clara University

- Analyzed 5,000+ scraped Twitter, Reddit, and YouTube posts with an NLP and **machine learning** pipeline comparing BERTopic, LDA, and NMF to measure sentiment toward LLMs as a therapeutic tool.
- Co-author and primary writer of *Public Perceptions of ChatGPT as a Therapist-Like Tool*, accepted at HI-BI-BI 2026 (ASONAM-collocated); proceedings forthcoming with Springer.

Lab Teaching Assistant (C++)

Sept 2025 – June 2026

Santa Clara University

- Mentored 40+ students in C++ memory management, pointers, and object-oriented design, **debugging** logic and memory errors live with GDB.

PROJECTS

Internship Monitor | Python, SQLite, GitHub Actions, pytest

2026

- Co-built a Python job monitor tracking 106 companies across 17 job-board types; added the Simplify, Oracle, and SmartRecruiters parsers to a 308-test suite.
- Suppressed repeat alerts with a normalized employer-plus-title dedup key after finding ~2,900 of 14,808 listings were reposts issued under new job IDs.

Social Network | C++, Qt, Graphs

2025

- Built a C++ Qt social app over an adjacency-set friend graph, ranking friend suggestions by mutual-friend count, with BFS shortest-path search and file persistence.

Kuhn Poker vs Quantum | Python, Qiskit, FastAPI, React

2026

- Built a Kuhn poker AI whose bet and call probabilities come from a 12-parameter, 6-qubit variational circuit, optimized with COBYLA over 5 restarts to minimize exploitability across all 64 pure opponent strategies; verified on IBM hardware at 4,096 shots.

TECHNICAL SKILLS

Languages: C++, Python, Java, SQL, JavaScript

Frameworks & Tools: React.js, Node.js, Spring Boot, FastAPI, Docker (containers), Linux, Git, Qt, Vercel, CI/CD, Render, REST/RESTful APIs, Stripe

Cloud & Data: AWS (EC2, RDS, Bedrock, Cognito, S3, CloudFront, Lambda), PostgreSQL, MySQL, Redis, DynamoDB (NoSQL), ChromaDB

AI / ML: Machine Learning, NLP, computer vision, RAG, MCP, PyTorch, CLIP, vector embeddings, Ollama, OpenWebUI, NumPy, Pandas, Matplotlib, topic modeling (BERTopic, LDA, NMF)

Quantum: Qiskit, IBM Quantum
