EDUCATION

Santa Clara University — B.S. in Computer Science

Expected Fall 2027

Major GPA: 4.0

Relevant Coursework: Advanced Algorithms, Data Structures & Algorithms, Advanced C++, Theory of Automata, Linear Algebra, Discrete Mathematics

WORK EXPERIENCE

Co-Founder & Software Engineer

May 2026 – Present

Adorus (adorusjewels.com)

- Sole developer on a 4-person founding team, architecting and building a full-stack platform end-to-end across 6 planned development phases (pre-launch).
- Designed the system architecture and data layer — data models, REST API contracts, and component structure — across 9 database migrations and 30+ API endpoints, focused on reliability and data consistency.
- Built a responsive **React** frontend backed by **Java Spring Boot** REST services and a **PostgreSQL** database (AWS RDS), deployed across 5 AWS services (EC2, RDS, S3, CloudFront, Cognito) with **CI/CD** auto-deployment via GitHub Actions.
- Integrated Stripe for PCI-compliant checkout and webhook-driven order fulfillment; implemented AWS Cognito auth with separate customer and admin roles.
- Authored a [blog post](#) on human oversight of AI coding tools and safe data-migration practices, prompted by a production migration incident during deployment.

Software Engineering Intern

June 2026 – Present

HerbsPro

- Implementing backend features across the e-commerce stack.

CS Teaching Assistant & Algorithms Grader

Sept 2025 – June 2026

Santa Clara University

- Mentored 40+ students in **C++** (memory management, pointers, OOP) and debugged logic errors live using **GDB**.
- Graded Theory of Algorithms coursework for 40+ students across 2 sections, evaluating runtime analysis, greedy, divide-and-conquer, and dynamic-programming solutions.

Machine Learning Research Assistant

Dec 2025 – June 2026

Santa Clara University

- Co-authored a peer-reviewed paper as primary writer, accepted at **HIBIBI 2026** (ASONAM-collocated), publishing with **Springer**.
- Built an **NLP/data pipeline** analyzing 5,000+ scraped posts to study public sentiment toward LLMs, applying BERTopic, LDA, and NMF topic modeling.
- Engineered Pandas preprocessing to normalize unstructured text, reducing noise in high-dimensional datasets.

PROJECTS

Social Network (C++ / Qt)

Sept 2025

C++, Qt, MVC, Graphs

[Github](#)

- Built a desktop social networking app in **C++** with a Qt GUI and MVC architecture; modeled friendships with a custom graph and generated friend suggestions via **BFS** traversal, with file I/O for persistence.

Disease Tracker (AWS Hackathon)

Oct 2025

React, FastAPI (Python), AWS Bedrock, DynamoDB

[Github](#)

- Built a **FastAPI** (Python) REST API serving real-time disease metrics and risk assessments with low-latency responses.
- Engineered an AWS Bedrock AI risk-scoring pipeline and designed **DynamoDB** schemas for scalable data ingestion.

Agentic Restaurant RAG

July 2025

Python, ChromaDB, Ollama, MCP, RAG

[Github](#)

- Built a RAG system in **Python** answering natural-language restaurant questions via ChromaDB semantic search.
- Exposed data as agent tools over an **MCP** server (JSON-RPC); tested on OpenWebUI with Ollama.

Kuhn Poker vs Quantum

June 2026

Qiskit, IBM Quantum, FastAPI (Python), React

[Github](#), [Live](#)

- Built and deployed a full-stack game (React + **FastAPI**) driven by a 6-qubit variational quantum circuit run on real IBM quantum hardware; real-chip probabilities matched simulation within ~1.7 points on a 4,096-shot run.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, Java, SQL

Frameworks & Tools: React.js, Node.js, Spring Boot, FastAPI, Docker, Linux, Git, CI/CD (GitHub Actions), Qt

Cloud & Data: AWS (EC2, RDS, S3, CloudFront, Cognito, Bedrock), PostgreSQL, DynamoDB, ChromaDB

CS Fundamentals: Data structures, algorithms, OOP, complexity analysis, networking, distributed & backend systems

AI / ML: RAG, MCP, NLP, Pandas, NumPy, topic modeling (BERTopic, LDA, NMF)
