EDUCATION

Santa Clara University — B.S. in Computer Science

Expected December 2027

GPA: 3.9

Available Summer 2027 (Fall 2027 term remaining)

- **Relevant Coursework:** Operating Systems, Advanced C++, Advanced Algorithms, Data Structures & Algorithms, Theory of Automata, Discrete Mathematics

WORK EXPERIENCE

Software Engineering Intern

June 2026 – August 2026

HerbsPro

- Cut MySQL query volume 60% and product API p50 from 200 ms to 90 ms with a cache-aside Redis layer using event-driven invalidation across a 50,000+ SKU catalog.
- Built a Python MCP server (FastMCP) as the only access path for LLM agents into a legacy MySQL WMS: read tools for live stock, write tools emitting split-shipment pick tickets instead of raw table mutations.
- Built a Pandas **ETL pipeline** that normalized 150+ unstructured supplier meeting notes and extracted supplier terms into structured records for brand analysis and contracting.

Software Engineer

May 2026 – Present

Adorus

- Shipped AI virtual try-on at ~\$0.05/image after benchmarking 5 approaches (Bedrock Nova Canvas, Stability, Rekognition, Gemini) on identity preservation, fidelity, latency, and cost.
- Fixed a **production** tax bug that folded tax into shipping totals, re-sourcing amounts from Stripe's API with 3 regression **tests**; hardened a Flyway migration against a cross-environment failure.
- Modeled the post-purchase lifecycle as a **6-state order machine** on server-verified Shippo webhooks, decrementing per-variant inventory only on confirmed-paid transitions.
- Served private S3 imagery only through CloudFront with Origin Access Control and object-scoped IAM, **invalidating edge caches on delete** so removed assets stop serving before TTL expiry.
- Built and operate the service behind it: **35 RESTful endpoints** on Java Spring Boot over PostgreSQL (AWS RDS), across 5 AWS services at ~\$40/month.

AI/ML Research Assistant

Dec 2025 – June 2026

Santa Clara University

- Co-author and primary writer of *Public Perceptions of ChatGPT as a Therapist-Like Tool*, accepted at HI-BI-BI 2026 (ASONAM-collated); proceedings forthcoming with Springer.
- Analyzed 5,000+ scraped Twitter, Reddit, and YouTube posts with an NLP and **machine learning** pipeline comparing BERTopic, LDA, and NMF to measure sentiment toward LLMs as a therapeutic tool.

C++ Lab Teaching Assistant

Sept 2025 – June 2026

Santa Clara University

- Mentored 40+ students in C++ memory management, pointers, and object-oriented design, **debugging** logic and memory errors live with GDB.

PROJECTS

Internship Monitor | Python, SQLite, REST APIs, Railway, Discord

2026

- Keeps 13 parsers alive against upstream markup drift across Greenhouse, Ashby, Lever, Workday, and iCIMS; polls 60+ career pages every 45 minutes as a 24/7 Python daemon on Railway.
- Suppressed false alerts that ID-diffing missed with a normalized employer-plus-title dedup key collapsing reposts issued under new job IDs.

Disease Tracker | React, FastAPI, AWS Bedrock, DynamoDB

Oct 2025

- Served real-time disease metrics and risk assessments through a FastAPI REST API backed by an AWS Bedrock risk-scoring pipeline over DynamoDB schemas designed for **scalable** ingestion.

Social Network | C++, Qt, MVC, Graphs

2025

- Generated friend suggestions via BFS traversal over a custom graph in a C++ Qt desktop app built on **MVC**, with file I/O for persistence.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, SQL

Frameworks & Tools: React.js, Node.js, Spring Boot, FastAPI, Docker (containers), Linux, Git, Qt, Vercel, CI/CD, Render, REST/RESTful APIs, Stripe

Cloud & Data: AWS (EC2, RDS, Bedrock, Cognito, S3, CloudFront), PostgreSQL, MySQL, Redis, DynamoDB (NoSQL), ChromaDB

AI / ML: Machine Learning, NLP, RAG, MCP, vector embeddings, Ollama, OpenWebUI, NumPy, Pandas, Matplotlib, topic modeling (BERTopic, LDA, NMF)

Quantum: Qiskit, IBM Quantum
